

4th step

Create a list of players

After creating a database, you can now enter the players for their tournaments. Before you create a tournament, all players must be entered.

You do this in the upper tab under

Player List.

Here are several ways to enter players:

1. **Add players from the DWZ list**

If you want to add players from the DWZ list, click the **DWZ database** button and add the players there.

2. **Adding players from the ELO list**

If you want to add players from the ELO list, click on the **ELO database** button and add the players there.

3. **Add Players Manually**

If you want to add players manually, click the **New Player** button and add the players there.

After entering all players, you can now enter their tournaments.
